Evonex is one of the most feature rich hosted telephony solutions on the market with a proven heritage of functionality. Importantly it's intuitive and easy to use and just as easy to manage. The platform provides complete flexibility and is future proof as well as providing security and business continuity.

Provided on a subscription service, your telephony is hosted and supported by us, leaving you free to run your business. Evonex has all the features and power of a traditional business telephone system but is hosted in our cloud and you don't need any specialist knowledge or skills to make the most of all the features the system provides.

For more information about our Evonex Hosted Telephony service, please contact us today on:

# FLEXIBLE, COST EFFECTIVE **BUSINESS COMMUNICATIONS**

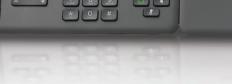

Evonex hosted telephony is the ideal solution for businesses of all sizes. Staff efficiency is improved with easy-to-use features and built-in Business Continuity ensures that, whatever the situation, you will never miss a call.

### Switching couldn't be easier.

- > Intuitive user portal and call features at your finger tips
- > HD voice and video capability
- > Full compatibility with leading **Cisco handsets**
- > Flexibility to use an approved range of other popular hosted handsets
- > Strong Hot Desking and Call Park features

The expansion modules simply bolt on to a compatible handset, allowing it to grow alongside your business.

1 2

- > Conference 3 party ad hoc and conference bridge
- > Address books see who is calling and Click-2-Dial straight from your contacts
- > See when colleagues are free with Line Monitoring, and transfer calls to any internal or external number easily
- > Functionality that is equivalent to, if not superior than, the leading on premise IP systems

# **FEATURES & APPLICATIONS**

The Evonex platform is a future proof, feature rich, fully supported hosted telephony solution built on highly resilient, patented, super reliable technology that is easy to use and manage. It has a range of market leading applications designed to make your everyday communications experience highly effective in the fast moving world of business.

# **Business Continuity**

Ensure you still get calls even when your connection is down with a failover number activated via the portal, using any device with an internet connection or using a standard telephone connection and PIN.

### Hunt Groups & Call Queue Management

Automatically schedule time-based routing plans and personalised messages. Manage up to 50 gueues, edit gueue durations and volumes. manage what happens next and enable manual override for system administrators to move calls up, down and out of queues.

# Manage Contacts

Manage personal and company address books access call history; inbound, outbound and missed calls and save time with click to call.

# **Call Recording**

Choose what to record: all calls, percentage of calls, inbound / outbound. Calls can be stored for up to 6 months. (Auditable records of call recordings are kept online indefinitely). Authorised administrators can search, playback, download and delete.

# Presence & IM

The desktop application enables you to update your presence, add contacts to your directories, add speed dial numbers, and make, answer, transfer, hold and hang up calls. Presence enables you to see who is available and choose how to contact them, for those quick questions needing immediate answers.

# Click to Call & **CRM** Integration

Improve efficiency with screen pops and click to call. Evonex is designed to plug straight into the leading CRM systems and business applications.

# **Call Management**

Manage your calls with the easy to use desktop application which shows your phone activity for the day, so you can always see what calls you need to return, what voicemails vou need to listen to and what Instant Messages and alerts you need to respond to.

# **WALLBOARDS**

With Wallboards you can view performance statistics from your desktop or mobile device. They provide an essential insight into your call activity and help you manage the system even when you are away from the office.

Wallboards display near real-time call statistics across a group of phones, allowing Call Group members to monitor and manage call level performance.

The Evonex wall boards display call statistics across a group of phones, allowing Call Group members to monitor activity and respond to performance issues. Statistics can be displayed on any web-enabled and connected device.

Wall boards provide teams with a view of how they are performing, the number of callers in the queue and past activity, which can highlight when additional members may be required to login to cater for busy times.

- > Inbound calls answered calls, lost calls, queued calls and ring duration by group or individual users
- > Outbound calls average duration and maximum duration by group or individual users
- > Queued calls average queue time, maximum queue time, queue limit breaches, timeouts, callers in queue
