

Ken Williams Motors

Ken Williams Motors have built an excellent reputation for providing high quality vehicle breakdown and recovery services across South Wales including Swansea and Carmarthen, for over 25 years.

BUSINESS CHALLENGES

- The telephone system in the head office was very old and now didn't meet the needs of the business.
- A new office was being opened in the same industrial estate and integration between the two sites was required.
- Support was required as they deal with callouts for breakdowns and accidents 24/7.
- Automate calls between MOT Garage and Police Compound work.
- Upgrade phone lines to IP lines to share across both sites.
- Ability to use existing traditional cabling and CAT 5 cabling at each site.

“ Having had issues with BT and not being able to get a correct solution, it was great to deal with a company that knows about telecoms. From the initial consultation, within two weeks we had a fully operational site-to-site solution, with SCG now in control of all services.

Jamie Williams

”
