

# SCG: Driving your business forward

A lack of connectivity gridlocks all business on your forecourt. You need secure connectivity back to your manufacturers, continuous operation of all your Cloud-based business line applications, and wireless coverage for your customers.

## Maximise the efficiency of your network infrastructure

Highly resilient and secure connectivity, disaster recovery, granular control, traffic segmentation, scheduled reporting and the ability to manage media data downloads from manufacturers.

## Manage multiple sites from a single pane of glass

A single, intuitive interface providing a holistic view of your entire estate to drive management and uniformity across all forecourts, with alerts for any critical IT infrastructure such as 24/7 CCTV to secure your vehicles.

## Maximise your customers' experience

Separated customer and line of business traffic ensuring high performance Wi-Fi access for customers across your forecourt, and instant resolution of catalogue searches.

## More than just connectivity...

- Proactive management of all LAN infrastructure
- Full structured cabling
- 24/7 support available
- Fully integrated telephony solutions (on-premise, hosted and business mobile)

**You strive to get more mileage to the gallon in your vehicle, so why tolerate inefficiency in your IT infrastructure? It's time for a tune-up.**
